## W H O W E A R E

The university of Toronto Formula Racing Team (UTFR) is an engineering design team that fully designs, manufactures, and races a new electric — driverless capable — Formula One style race car every year. We compete in Formula SAE, the largest intercollegiate engineering design competition in the world with over 600 participating universities. Competitions consist of dynamic events including endurance, acceleration, and autocross. In addition, we are judged on design rationale and business acumen by industry professionals.

Since 1999, we have competed across North America and Europe gaining a reputation for ruthless competitiveness and unique design concepts, winning three world championships over this time. A tradition which lives on in 2023 with a first place finish at the New Hampshire Formula Hybrid + Electric, a top five finish at Formula SAE Electric Michigan, and a 6th place at Formula Student Czech Republic!

Being a part of UTFR requires an unparalleled level of dedication when compared to other university teams. Throughout the entire year, team members are regularly putting in 25 hours (often far more) of work a week at our shop on top of their full-time studies, including during summer months and school holidays. We are committed to achieving maximum performance in competitions, breaking boundaries in design, and fostering student development.

## PARTNER SUPPORT

### WHY PARTNER WITH UTFR?

All of our successes are thanks to the help we receive from our sponsors. In return, we work to maximise the return on investment for each partner of the team. We have a long-standing history of catering to the particular needs of companies and organisations who support us. With defined sponsorship levels featuring different benefits, our partners have clarity on exactly what we can provide them.

Some of the most popular sponsor benefits are featuring your logo on our car, banners and website, as well as social media features and opportunities to network with the team. As a fully undergraduate student-run team, we are incredibly appreciative of the generous financial and in-kind support we receive from our sponsors which allows us to continue our tenacious work towards maximising performance.

## PUBLICITY

Our sponsor logos are proudly on our car, website and promotional boards wherever we go. We can also provide you with high quality pictures of our car and team which you can feature in promotional material for your company.

As of October 2023, our Instagram account, @uoftfsae (see left), has approximately 3,200 followers and has doubled in size in the past year. Instagram Reels have received over 100,000 views so far in 2023.

For sponsors, we offer high-quality Instagram posts consisting of photos relevant to the sponsor's product, or of the sponsor's product in use during our manufacturing process. We are happy to tailor all posts to individual brands' needs, utilising Instagram features such as Reels and Stories, as well as using other social media platforms including LinkedIn and TikTok.

## INSTAGRAM

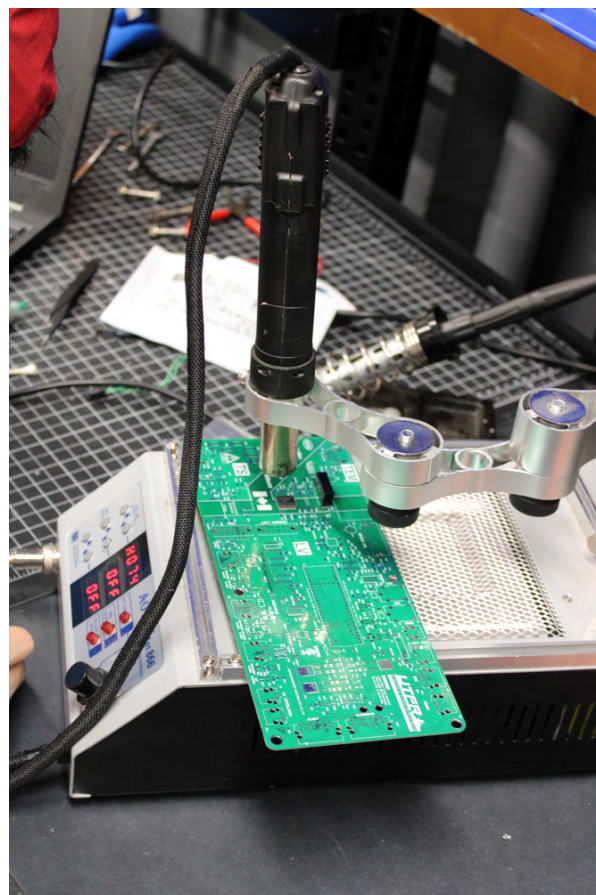

## EXPOSURE

---

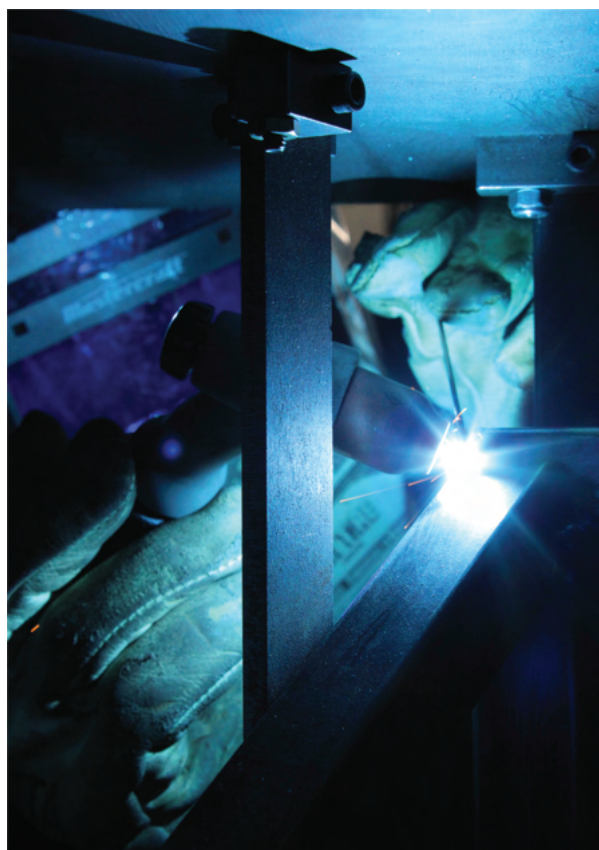

### EXPOSURE TO PRODUCT

Sponsoring us will position your company's products to be used extensively by some of the University of Toronto's top engineering students. Our engineers become intimately familiar with the technologies and products incorporated into our vehicles as students' tenure on UTFR regularly spans up to five years! This immersive experience nurtures a strong bond between our engineers and the products they use, making your products the preferred choice for future projects and endeavours.

### EXPOSURE TO BRAND

Your involvement in our team's journey will not only showcase your company's dedication to education and innovation, but also position you as a driving force behind the advancement of engineering excellence. You will demonstrate a profound commitment to fostering the growth of young students and empowering them to push the boundaries of what they can accomplish. This is something which is noticed by members of the team and other keen University of Toronto students. UTFR works with many other student organisations across campus and at events to make our team a success.

## R E C R U I T I N G

Working with us will allow your company to gain direct access to a pool of talented, ambitious and dedicated students which presents a unique opportunity for recruitment and talent acquisition. Our team is comprised of individuals from a diverse background of engineering disciplines including mechanical, electrical, and engineering science among many others. The team also consists of a large number of students studying computer science and business, each contributing their expertise in roles relevant to their degrees.

You will be able to engage with these top-tier students, fostering meaningful connections that may lead to potential internships and full-time positions within your organisation. Many of our sponsors in the past have found successful candidates for positions at their companies due to connections they made with team members.

We currently have ten members who worked at Tesla's California campus, and several who worked at each Multimatic, Williams Advanced Engineering, Litens, and Redbull Powertrains.

## UTFR UNVEILING

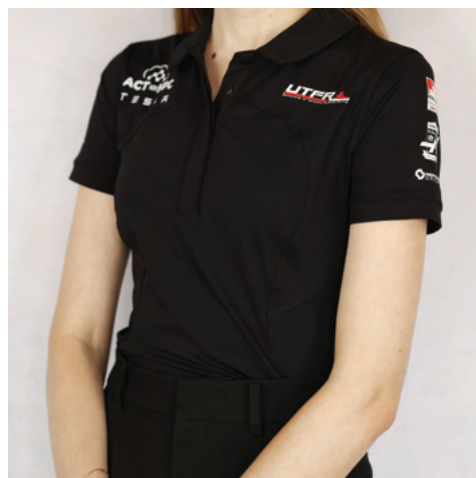

In 2023 we hosted our first ever large-scale unveiling event to showcase our monumental UT23 vehicle. Hosting an event like this is an enriching experience for our team and allows us to exemplify our community and take pride in our work. Speeches are given by each of our technical directors, and the Dean of Engineering. We extend invitations to our sponsors and encourage them to come celebrate the love of automotive with us! This is one great opportunity for the whole team to meet and connect with sponsors.

## MERCHANDISE

At international competitions, we are proud to represent the University of Toronto and Canada as a whole. With this in mind, we have chosen Canada's beloved athletic company, Lululemon, to outfit the team. The logos of our sponsors can be placed on various articles of clothing which are worn by over fifty of our members at competitions and events, as well as around the UofT campus regularly.

## E V E N T S

---

We hold and attend a variety of events every year including the Honda Toronto Indy, the Canadian International Autoshow, and various UofT events including club fairs, Alumni Reunion Festival and many more. UTFR also holds a variety of events including a Women in Motorsport Panel. We always display our car and sponsorship boards at all the events we attend.

If there is something which has not been mentioned which you would like from us, we are more than happy to accommodate most requests a sponsor may have.
